YASH BORA

Machine Learning & Data Science Engineer

+91-8624962343 | yashbora567@gmail.com | LinkedIn | GitHub

SUMMARY

Motivated ML & Data Science engineer with a strong foundation in Python, deep learning, and statistical modelling. Experienced in building and deploying end-to-end AI/ML solutions — from model development to production. Skilled in LLMs, RAG pipelines, and full-stack AI application deployment.

EDUCATION

B.E. in Information Technology *2023 – 2027*
Pune Vidhyarthi Griha's College of Engineering and Technology · Pune, India

- CGPA: **9.16 / 10** | Coursework: Data Structures, Algorithms, DBMS, Statistics, ML

EXPERIENCE

AI/ML Intern — GenAI & LLM *Jan 2026 – Apr 2026*
Edu Plus Now · UDNAV ERP Software Technologies (A Vishwakarma Group Initiative) · Pune

- Completed 120-hour intensive program on AI, ML, Generative AI, and Large Language Models (LLMs).
- Built projects covering Transformer architectures, prompt engineering, and RAG-based retrieval systems.
- Collaborated on applied AI solutions in association with PVG's College of Engineering and Technology.

Project Intern — Machine Learning & Deep Learning *Jan 2025 – Feb 2025*
Edunet Foundation · Pune, India

- Applied 10+ ML/DL models (CNN, ARIMA) on large-scale datasets using TensorFlow and Scikit-Learn.
- Delivered 3 end-to-end AI solutions including an image classifier, achieving a **15% gain** in processing efficiency.
- Presented weekly findings to mentors; maintained detailed SOPs for all implemented models.

PROJECTS

Sports RAG System — Live Demo
Python · FastAPI · Streamlit · FAISS · LangChain · HuggingFace · Docker

- Built a Retrieval-Augmented Generation (RAG) app for sports query answering using Python, FastAPI, and Streamlit.
- Implemented semantic search via **FAISS** vector database and HuggingFace embeddings for low-latency retrieval.
- Designed end-to-end pipeline: ingestion → chunking → embedding → FAISS index → retrieval → LLM response.
- Containerised with **Docker** for portable, scalable deployment; integrated LangChain for grounded LLM responses.

Plant Disease Detection — Live Demo
CNN · OpenCV · TensorFlow · Streamlit · Kaggle · Matplotlib

- Trained a CNN on **50,000+ Kaggle images** classifying 38 plant disease categories with **96% accuracy**.
- Built OpenCV preprocessing pipelines (augmentation, normalisation, resizing) to improve model generalisation.
- Deployed a real-time Streamlit web app with live disease prediction and Matplotlib visualisations.

TECHNICAL SKILLS

ML / DL	Python, TensorFlow, PyTorch, Scikit-Learn, CNNs, RNNs, LSTMs, NLP, OpenCV, Model Optimisation
GenAI & LLMs	Transformers (BERT, GPT), LangChain, LangSmith, LangServe, RAG, FAISS, HuggingFace, Prompt Engineering
Data & Analytics	Pandas, NumPy, EDA, Matplotlib, Seaborn, PostgreSQL, Tableau
Deployment	Streamlit, Flask, FastAPI, Docker, Render
Tools	Git / GitHub, Jupyter Notebook, VS Code, C++, Java

CERTIFICATIONS

- **AWS re/Start Graduate**
- **Programming Using Python**
- **ChatGPT For Everyone**
- **Software Engineering Job Simulation**
- **Advanced C++**
