PROFESSIONAL SUMMARY

Final-year B.E. Information Technology student (CGPA 9.16/10) with hands-on experience building Generative AI applications, RAG pipelines, and agentic AI systems using Python, LangChain, and LangGraph. Comfortable across the full stack — from LLM integration and prompt engineering to FastAPI backends, PostgreSQL, and cloud deployment. Currently working as a GenAI Intern building production AI agents; prior experience spans machine learning, deep learning, and end-to-end AI application delivery.

TECHNICAL SKILLS

GenAI & LLMs: LangChain, LangGraph, LangSmith, LangServe, RAG, Prompt Engineering, Transformers (BERT, GPT), FAISS, HuggingFace, Agentic Workflows
Machine Learning / Deep Learning: Python, TensorFlow, Scikit-learn, ANN, CNN, RNN, LSTM, NLP, OpenCV, Model Optimization
Backend & Deployment: FastAPI, Flask, Streamlit, Docker, REST APIs, Render, Hugging Face Spaces
Data & Analytics: Pandas, NumPy, EDA, Matplotlib, Seaborn, PostgreSQL, SQLite, Tableau
Languages & Tools: Python, C++, Java (Basics), SQL, MongoDB, Git/GitHub, VS Code, Jupyter Notebook
DSA & Problem Solving: 343+ problems solved on LeetCode (155 Easy, 170 Medium, 18 Hard) · 100 Days Badge 2026 · 30-day max streak

EXPERIENCE

GenAI Intern — Parallel Minds *Jul 2026 – Present*

- Build AI agents and Generative AI applications in Python using LangChain and large language models for production use cases.
- Develop RAG pipelines with embeddings and vector databases to power intelligent information retrieval.
- Engineer and iterate on prompts to improve response quality, accuracy, and AI workflow performance.
- Build REST APIs with FastAPI and integrate AI services into production-ready applications backed by PostgreSQL.

AI/ML Intern — GenAI & LLM — UDNAV ERP Software Technologies (Edu Plus Now) *Jan 2026 – Apr 2026*

- Built end-to-end AI applications spanning Streamlit front-ends and FastAPI back-end services, integrating Gemini and Groq LLM APIs and debugging cross-platform deployment issues on Docker.
- Delivered full SDLC artifacts — requirements through deployment — for AI tools hosted on Hugging Face Spaces.

PROJECTS

Multi-modal Agentic Assistant GitHub | Live Demo

Python · LangGraph · LangChain · FastAPI · Streamlit · OCR · Whisper STT · Render

- Built a multi-modal agentic assistant that processes PDFs, images, audio, YouTube video, and general queries through tool-based workflows.
- Designed a LangGraph planner that decomposes requests, selects the appropriate tool, and maintains bounded conversation state.
- Implemented PDF extraction, OCR, speech transcription, YouTube processing, query-aware chunking, ambiguity handling, structured LLM outputs, retry logic, and model fallback routing.
- Developed FastAPI services and a Streamlit interface with token-usage monitoring; deployed the full application end-to-end on Render.

E-commerce Analytics Agentic System Live Demo

Python · LangGraph · FastAPI · SQLite · Groq · JavaScript

- Built an agentic analytics system that answers natural-language questions over a 21-column e-commerce dataset, auto-generating SQL, statistics, or charts as the query requires.
- Designed a LangGraph agent with guardrail, SQL-generation, execution, assessment, statistics, and charting nodes, supporting bounded multi-round querying.
- Implemented a read-only SQL validator (SQLite authorizer) to block unsafe queries before execution; built a FastAPI backend and JavaScript chat frontend with session memory, summarization, and per-request token telemetry via Groq.

Sports Analytics RAG System GitHub

Python · FastAPI · Streamlit · FAISS · LangChain · Docker · Groq

- Built a full-stack RAG application combining FAISS semantic search, BM25 keyword search, reciprocal rank fusion, and cross-encoder reranking, reaching 97% query-routing accuracy, with an automated ingestion pipeline processing 100K+ documents; containerized with Docker and deployed on Hugging Face Spaces.

Voice-Enabled SQL Analytics Agent GitHub

Python · LangGraph · FastAPI · Whisper STT · edge-TTS · Gemini · PostgreSQL

- Built a voice-to-SQL-to-answer pipeline using a LangGraph ReAct agent and FastAPI endpoints for voice input, natural-language querying, and TTS playback, with schema caching, multi-turn memory, and an iterative SQL debugger.

EDUCATION

B.E. in Information Technology — PVG's College of Engineering & Technology, Pune *2023 – 2027*

CGPA: 9.16 / 10

CERTIFICATIONS

AWS re/Start Graduate · Programming Using Python (NIIT) · SWE Job Simulation (Forage) · ChatGPT For Everyone · Advanced C++
